SKILLS

- **Frontend & Mobile UI:** React.js, React Native concepts, JavaScript (ES6+), TypeScript, HTML5, CSS3, Responsive Design, Mobile-First UI
- **Backend & MERN Stack:** Node.js, Express.js, MongoDB (Mongoose), RESTful API Design, Microservices, Asynchronous Programming
- **Healthcare & Booking Systems:** Clinic Appointment Workflows, Doctor Scheduling Logic, Healthcare Data Privacy, State Management
- **Cloud & DevOps:** AWS concepts (EC2, S3), Oracle Cloud (OCI Certified), Docker, Git, GitHub, CI/CD Pipelines, Vercel Deployment
- **Testing & Tools:** Postman, Chrome DevTools, API Integration & Debugging, Automated Testing (Jest, Pytest), Linux/Bash
- **Core Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming (OOP), Relational & NoSQL DBMS, System Design

PROJECTS

Medical Appointment Management System — Full-Stack Healthcare SaaS & Booking | GitHub — Oct 2026

- Architected a multi-role healthcare appointment booking platform pairing a responsive React frontend with a modular Node.js/Express backend, structuring doctor consultation schedules and patient intake workflows.
- Engineered RESTful API endpoints with stateless JWT authentication, centralized error-handling middleware, parameterized database queries, and role-based access control (RBAC) ensuring patient confidentiality.
- Automated end-to-end API integration testing using Postman collections, debugging edge cases across concurrent reservation requests and deploying continuous production builds on cloud infrastructure.
- **Tech:** React 18, Node.js, Express, JavaScript (ES6+), RESTful APIs, JWT, Postman, Healthcare Data Modeling, Vercel, Git.

Food Delivery App — Responsive Customer Web Platform & Checkout Workflow | GitHub — Apr 2026

- Built a modern, responsive web application using React, JavaScript (ES6+), and Vite, crafting clean semantic HTML5 and CSS3 (Flexbox/Grid) layouts supporting all mobile and desktop viewports.
- Engineered client-side state management using React Context API for instant cart updates, dynamic pricing calculations, and interactive checkout workflows with Leaflet map integration.
- Integrated asynchronous RESTful API communication for dynamic catalog retrieval and order validation, deploying the application live on Vercel with optimized Core Web Vitals.
- **Tech:** React.js, JavaScript (ES6+), HTML5, CSS3 (Flexbox/Grid), Responsive UI, REST APIs, Leaflet, Vite, Vercel, Git.

FitTracker — Health Analytics & Real-Time Telemetry Platform | GitHub — Jan 2026

- Developed an interactive health and activity telemetry dashboard using React 19, JavaScript (ES6+), and Node.js, delivering mobile-first responsive layouts and smooth component transitions via Framer Motion.
- Integrated real-time bi-directional telemetry synchronization with Socket.io WebSockets, feeding dynamic time-series charts (Recharts) with physiological activity metrics and zero frame drops.
- Debugged state mutations and network lifecycles using Chrome DevTools, minimizing bundle sizes through code-splitting and asset preloading to achieve sub-1.2s First Contentful Paint.
- **Tech:** React 19, Node.js, JavaScript, Socket.io WebSockets, Recharts, Framer Motion, Chrome DevTools, REST APIs.

StockFlow — Enterprise Full-Stack Platform & Cloud Infrastructure | GitHub — Feb 2026

- Architected a full-stack data platform uniting a React/TypeScript interface with a high-throughput backend, implementing structured database schemas, foreign keys, and ACID transactions for state mutations.
- Optimized database execution via composite B-tree indexing and connection pooling, delivering sub-40ms query latencies while maintaining detailed technical schema documentation.
- Containerized multi-tier microservices with Docker Compose and Nginx reverse proxies, establishing automated multi-branch CI/CD test and deployment pipelines via GitHub Actions.
- **Tech:** React.js, TypeScript, Node.js/Python, PostgreSQL, Docker Compose, Nginx, Prometheus, Grafana, GitHub Actions.

ACHIEVEMENTS & RESEARCH

- **Code Off Duty Hackathon** — Qualified for Round 2 of the Code Off Duty Web Hackathon organized by Coding Wise, building and defending full-stack prototypes and algorithmic solutions under competitive time constraints. | Mar 2025
- **Data Structures and Algorithms Using C++** — Completed 3-month comprehensive training (Jun 2025 – Aug 2025) mastering graph theory, dynamic programming, priority queues, and asymptotic complexity optimization for robust software design.

CERTIFICATES

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate | Oracle University — Mar 2026
- Principles of Generative AI | Infosys Springboard — Dec 2025
- Master Generative AI & Tools | Udemy — Aug 2025

EDUCATION

- ***Lovely Professional University*** — **Punjab, India**
  Bachelor of Technology, Computer Science and Engineering (Artificial Intelligence & Machine Learning); CGPA: 8.32 — Aug 2023 – Jul 2027
- ***Sri Shiridi Sai Jr College*** — **Rajahmundry, Andhra Pradesh**
  Intermediate (MPC); Percentage: 87.8% — Jun 2021 – Apr 2023
- ***Vignan School*** — **Malikipuram, Andhra Pradesh**
  Secondary School; Percentage: 81% — Jun 2019 – Apr 2021
